

## ***Diversified Livestock Extension Program*** **Producer Listening Sessions**

**Calling all  
Livestock Producers!**

Join UConn Extension for a chance to share your needs, challenges, and aspirations as a livestock producer in Connecticut. As the Diversified Livestock Extension Program develops, we want to be sure we are bridging the gaps in order to meet the needs of all producers.

**Meet the new Diversified  
Livestock Extension Field  
Based Specialist,  
MacKenzie White**

MacKenzie's new role involves planning, implementing, and evaluating impactful extension programs primarily related to commercial livestock production. Livestock species include but are not limited to beef, sheep, swine and goats.
